Answer Questions about Medication Storage and Earn a \$50 Amazon Gift

If you, or someone you live with, have experience with **medication for opioid use disorder*** and reside in a household where young children spend a significant amount of time, we invite you to share your thoughts about medication storage with our research team.

We want to speak with:

- ✔ people who currently are taking or formerly have taken medication for opioid use disorder*
- ✔ people who live with someone who currently is taking/formerly has taken medication for opioid use disorder*
- ✔ people who live in households where children under age 6 or under spend a significant amount of time

Individuals selected for the study will participate in a 30–45-minute interview and receive a \$50 Amazon Gift Card for their time.

The information you share will be used to help others learn how to safely store these medications.

Ready to talk to our research team?

Send Joy Eckert (jeckert@reaganudall.org) an email and a researcher will contact you.

**medication that contains methadone or buprenorphine, including branded medications such as Suboxone or Zubsolv*
