date

overdose?

OD type

yes no don't
describe: know

stimulant
opioid

circle textures

crystal pill rock shards tar
powder oil/wax plant/leaf
↳ chunky shiny flaky dull fine

other:

sample number

1 **Unfold cloth, lay out supplies.**

2 **Unpeel tape, unscrew vial.**

video

3 **Wear gloves to prevent contamination.**

Powder
(best results)

2 scoops

or

Baggie

Wet swab
in vial

Run along
inside 5x
collecting
residue

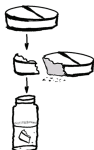

Stir into
vial and
discard
swab

or

Pill

Break off
1/4 with
clean knife,
drop in vial

or

Cotton

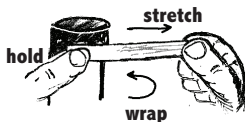

Drop in
used cotton

No edibles, please. Syringe, foil, and pipe residue also not ideal for analysis.

4 **Close vial tightly. Seal using wax tape.**

Remove tape
from white backing.

5 **Complete back of this card.
Card and vial go back in bag.**

6 **Give QR code to donor for results.**
